SEIPI'S ANNUAL BUSINESS PARTNERS

The Philippine Semiconductor and Electronics Convention and Exhibition (PSECE) is the country's premier gathering of industry leaders, innovators, and stakeholders in the semiconductor and electronics sector. Organized by the Semiconductor and Electronics Industries in the Philippines Foundation, Inc. (SEIPI), the event brings together key players from manufacturing, government, academe, and allied industries.

PSECE 2026 takes place during a landmark year as the Philippines hosts ASEAN, placing the country at the forefront of regional collaboration and innovation. This presents exhibitors with a unique opportunity to showcase their products and technologies to a wider audience of industry leaders, decision-makers, and potential partners from across Southeast Asia.

More than the country's premier semiconductor and electronics conference, PSECE 2026 is a gateway to greater regional visibility, strategic partnerships, and new business opportunities. Be part of this milestone event and position your company at the center of the ASEAN semiconductor and electronics industry.

The ASEAN Semiconductor and Electronics Forum (ASEF) 2026 is the premier executive platform driving strategic dialogue on the future of ASEAN's semiconductor and electronics industry. Hosted by SEIPI under the Philippines' ASEAN Chairship, ASEF convenes C-suite executives, government leaders, global technology companies, investors, and academia to define regional priorities that will strengthen ASEAN's competitiveness in the global semiconductor value chain.

As an ASEF Corporate Partner, your organization is recognized as a strategic contributor to regional industrial transformation—championing innovation, resilient supply chains, AI-enabled manufacturing, and sustainable growth.

Your partnership also extends your visibility to the 21st Philippine Semiconductor and Electronics Convention and Exhibition (PSECE)—the Philippines' largest semiconductor and electronics gathering—providing direct engagement with thousands of industry professionals, customers, technology providers, and decision-makers across the manufacturing ecosystem.
